Sleepy Hollow, NY 10591

Bob and Tom,

On behalf of the Testa family, I would like to thank you and the MonuMedic team for performing such an outstanding restoration of our family plot in Assumption Cemetery. The central granite and limestone monument had gone untouched for nearly a century. It was blackened and stained from decades of exposure to the elements. The individual headstones were in similar condition. You guaranteed that we would be pleased with the result of your non-abrasive and environmentally friendly process and you were right!

We have known for many years that it was time to clean the statue and stones in our family plot. It was the right thing to do to honor our deceased family members. We had been struggling with how to achieve that goal without destroying the monuments or negatively affecting the surrounding environment. After discovering MonuMedics and seeing the results of your work, and knowing that museums and national monuments rely on your process, the choice became obvious to us.

Thanks again for your outstanding work. We have peace of mind knowing we accomplished our goal of preserving and honoring the memory of our ancestors without damaging the stones or the environment.

All the best,

A handwritten signature in black ink that reads "John G. Testa". The signature is written in a cursive style with a long horizontal stroke at the end.

John G. Testa
